

"I ONLY EVER HEAR MIMIMI"

DARE TO IMPLANT!

In our **Implantology training sessions**, as a dentist, you have the chance to perform your first **minimally invasive dental implant placement using the MIMI® technique** on a patient, under professional supervision.

From experience, we know that many participants of Implantology courses, even after passing the theoretical part, still feel uncertain because they never had the opportunity to perform an implant placement themselves under supervision during the courses.

With our training sessions, we aim to break down this barrier and encourage beginners to take their first step into Dental Implantology using the minimally invasive MIMI implantation protocol.

Even after the course, you won't be left alone—receive ongoing support and engage in our WhatsApp groups for participants.

IMPLANT ON YOUR OWN

CONNECT AND SHARE

MIMI[®], IMMEDIATE IMPLANTS, PROSTHODONTICS

Discover the MIMI[®] method (Minimally Invasive Medical Implantation Method) in this course. This proven implantation method was developed by our lecturer Dr. Nedjat 30 years ago and has since received multiple awards. The course includes practical workshops and live surgeries using premium implants, all conducted under the expert supervision from our team. MIMI[®] offers time and cost advantages, a simplified workflow, and increased patient satisfaction.

This course is designed for beginners in Dental Implantology and experienced Implantologists who are staying up-to-date with current techniques.

Overview of subjects:

- Immediate implants
- MIMI[®] II (simultaneous distraction and implantation)
- Smart Grinder
(autologous graft produced from the patient's own teeth)
- MIMI[®] VI (Internal Direct Sinus Lift - IDS)
- Delayed implants
- Prosthodontics
- Workshops with premium implants
- Live surgeries

Benefit from our service and interactive discussions in our WhatsApp groups, where you can receive support and exchange information on all your questions regarding MIMI[®] and the implant system.
